

AMENDMENTS TO THE ABSTRACT:

Please amend page 7, paragraph 2, to read as follows:

ABSTRACT OF THE DISCLOSURE

An illumination device is disclosed which comprises a box-like body having a back wall and side walls extending from the back wall, an opening being formed in a wall opposite the back wall, while a decorative image is reproduced on an inner face of the back wall. A light source extends inwardly of or interiorly to a frame delimiting the opening, the side walls having inner faces made of reflective material.
